

PREVENT.  
PROTECT.  
EDUCATE.  
GRADUATE.

**MyLifeID is a healthcare information management company that enables individuals to have their Comprehensive Patient Profile including medical, health and fitness records with them wherever they go.**

Having their health information empowers individuals to seek health treatment for any reason under any scenario from whomever they want even in other countries as their records can be translated into multiple languages. This solution is delivered with options for online, offline portable or both methods.

**OVER 40% OF STUDENTS SUFFER A MEDICAL EVENT WHILE AWAY FROM HOME, SUCH AS:**

- Sports-Related Injuries
- Communicable Diseases
- Traffic Accidents & Indiscretions

On-campus infirmaries seldom have a complete understanding of a student's health history. This can result in slower or mistaken diagnosis, application of treatments or prescriptions with unforeseen side-effects and medical mistakes. Typical problems encountered at a school infirmary include:

- X Students don't have their health records
- X Schools have limited information and resources
- X Delays to access health/medical records can take days
- X Students' medical records may be in a foreign language
- X Doctors can't wait for health/medical records to be translated

**WHY SHOULD MY SCHOOL HAVE A HEALTH & WELLNESS PROGRAM?**

Incorporating MyLifeID into the student's enrollment helps the student, their family and the school become more participatory in the health and success of the educational journey while providing protection and better preparedness in a health situation. Schools can also extend the MyLifeID program to administrative staff and faculty helping to assist the entire school ecosystem. Benefits that organizations can realize from a health and wellness program:

- Reduced absenteeism
- Increased student and faculty morale
- Greater talent retention
- Enabling better on-campus medical assistance
- Mitigate risk to institutions

**THE MyLifeID  
HEALTH & WELLNESS EDUCATION PROGRAM**

The MyLifeID Health & Wellness Program is designed to accomplish a variety of goals

- Provide a benefit the Participant can use wherever they may be even if on an international exchange program
- Provide additional health safety measures to make the Participant more comfortable
- Help school return people safely to campus
- Keep campus safe for everyone from students to faculty and staff
- Enable health policy compliance

Contact MyLifeID or your local sales executive to learn more about the MyLifeID Health & Wellness Education Program

**Health & Wellness Program Goals  
for Individuals**
